

Weather Resistant Pipe Penetration Seal System

www.mclunitex.com

Specification

General:	The weather resisting pipe penetration seal is suitable to resist rainwater when no fire rating is required. It can be retro-fitted to existing pipe and sleeve arrangements and may be enhanced with a silicone bead along all peripheries.
Movement:	Standard seal construction will accommodate +/- 25mm in any plane.
Installation:	Each seal is supplied with installation instructions, sealant and stainless steel worm drive clips.
Location:	Seals to be installed on the weather hazard side of the penetration.
